

Carbon Reduction Plan Template

Supplier name: ScottMed Distribution (UK) Ltd

Publication date: 22nd May 2024

Commitment to achieving Net Zero

ScottMed is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year 2023-2024

Additional Details relating to the Baseline Emissions calculations.

2023 was the first year of emissions reporting. The period reported is April 2023 to March 2024.

The baseline emissions audit included all scopes 1 & 2 plus significant scope 3 emissions including, Upstream transportation, Waste generated in operations, Business travel, Employee commuting, Downstream transportation and distribution and Purchased goods and services.

The emissions have been calculated using the Greenhouse Gas Protocol (GHG) methods and targets set using the Science Based Targets Initiative (SBTi) principles keeping global warming within 1.5°C and achieving net zero by 2045 in line with NHS requirements.

Scopes 1 & 2 emissions were measured and calculated in accordance with SECR requirements.

Scope 1 emissions in the period were zero and excluded for the following reasons,

- a. No gas was consumed in the premises.
- b. No fuel was consumed for company vehicles as business travel was in personal vehicles and therefore included in Scope 3 category 6.
- c. There were no air conditioning gases replaced.

Scope 3 Emissions were measured and calculated in accordance with the GHG Corporate Value Chain (Scope 3) Standard.

Emissions Scope 1 Scope 2		Total (Tonnes CO₂e) 0.0 1.62			
			Scope 3 (Included Sources)		33.15
1	Purchased goods and services	24.3			
2	Capital goods	0.0			
3	Fuel- and energy-related activities (not included in Scope 1 or Scope 2)	0.6			
4	Upstream transportation and distribution	1.6			
5	Waste generated in operations and water	0.1			
6	Business travel	3.3			
7	Employee commuting	2.2			
8	Upstream leased assets	0.2			
9	Downstream transportation and distribution	0.8			
10	Processing of sold products	0.0			
11	Use of sold products	0.0			
12	End-of-life treatment of sold products	0.0			
13	Downstream leased assets	0.0			
14	Franchises	0.0			
15	Investments	0.0			
		1			
Total Scope 3 Emissions		33.15			
Total Emissions		34.8			

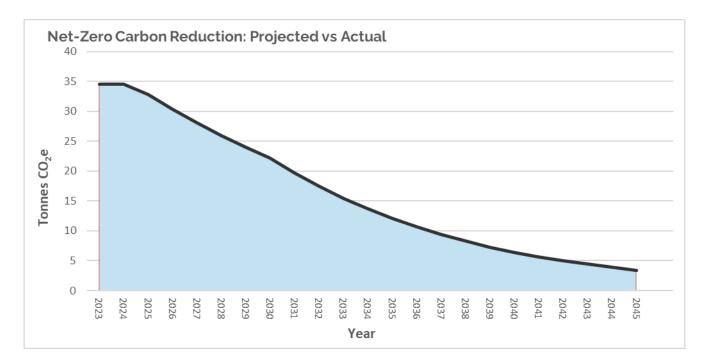

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 26 tCO $_2$ e by 2029. This is a reduction of 8.8%.

We also project that carbon emissions will decrease over the next ten years to 15 tCO2e by 2034. This is a reduction of 43%.

These targets have been set using the principles of the Science Based Targets Initiative to keep warming to 1.5°C and to reach Net Zero by 2045 as recommended by the NHS for its suppliers.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline.

- 1 Engagement with suppliers to establish emissions reduction policies.
- 2 Sourcing of goods changed from Canada to Ireland.
- 3 Reduction of plastic packaging material (Bubble Wrap).
- 4 100% Recycling of packaging material waste.

The carbon emission reduction achieved by these measures will be in effect when performing the contract.

In the future we hope to implement further measures such as:

- 1 Complete a full energy review.
- 2 Research switching to electric vehicles.
- 3 Further engagement with transport suppliers to jointly reduce emissions.

Declaration and Sign-off

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard. and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the managing director.

Signed on behalf of the Supplier:

8 Boler
